- SCRUM

WORK EXPERIENCE

Front-end developer

Paytime Fintech • April 2022 - present

- Got exposed to Angular during my tenure and used it as the main framework for most of the projects within Paytime
- Advocated and helped establishing best practices within the engineering team, which brought benefits to the stability of the product and code hygiene. Engineers feel better working in our products now.
- Being proactive and bringing many technical contributions that improved the overall experience at Paytime, I quickly got hired as a fulltime employee after only 3 months of internship, which felt nice.
- Responsible for developing the company website aswell as their customers' and ecommerce portal - www.paytime.com.br | www.conta.paytime.com.br
- Reviewing, analyzing and refactoring code
- Working closely with other teams to deliver the best possible user experience
